

Actions Practice

Stop_go

1. Add stop actions to frame one on the “actions” layer
2. Add frame labels for each step
3. Add on release gotoAndStop actions to each of the buttons. Make sure that the frame label matches your action. Test your project.
4. Add a behavior to your google button. Test in a browser.
5. When it is finished, high five the person sitting next to you and do a little jig.
